Meeting of Acadia Municipality's At Chinook

A meeting of the Acadia Municipality's was held in the Chinook Hotel on Wednesday July 8th, to discuss with Mr. Fallow Minister of Public Works also Mr. James M. L. A. Relief work to be done in this district.

\$500.00 being allotted for Acadia constituency \$500.00 for each Municipality. The work to be paid with script, at following rate:

Foreman per hour 55c
Man & team " 65c
Man & 4 horses " 85c
Man & 6 horses " \$1.10
Division 6 - Plans on cutting down the hill south of cemetery.

The Collholme Reeve and Councillors with the exception of Mr. Laughlin were present
Contributed by R. Stewart.

Youngstown Mental Home Plan Dropped

Gov't Will Construct
Oliver Institute Extention

EDMONTON, July 6 (Special Dispatch) - All consideration of housing mental patients to categories of insanity, with different types in different institutions, has been dropped after long discussion between government departments, it was indicated Monday as for construction of a new \$100,000 addition to Oliver Mental Institute neared completion.

For the past three months it had been planned, tentatively, to renovate the old Youngstown Agricultural School as a new mental hospital, and possibly move some of the present patients from Ponoka, Red Deer or Oliver to that new institution.

Funds Provided
Saturday, however, Public Works Minister W. A. Fallow announced that the government would proceed with the Oliver addition, funds for which were provided in the estimates presented to the Legislature at the last session.

As much as possible of the work Mr. Fallow said, will be hand labor; machinery will be used as little as possible in order to create employment. All workers, he added, will receive cash rather than script as wages, the money being taken from the public works department treasury.

The new building will be connected with the present units by a tunnel, Mr. Farrow said. The design of the addition was completed last winter, Mr. Fallow said that actual construction work will begin "in the near future."

Mr. N. F. Marcy shipped a car load of cattle to Calgary this week.

Corn Flakes 3 pkg .25c

1 large pkg Rins & 1 bar Lifebuoy

Soap both for .27c

Prunes 50-60 3 lbs .29c

Nabob Coffee 1 lb glass jar .49c

B. R. Baking Powder 1 lb tin .23c

Ideal Jam Assorted per pail .39c

Evaporated Apricots 2 lbs .45c

See us about all your canning needs.

Fresh Strawberries, Cherries, Lemons, Oranges, Lettuce, Tomatoes, Celery etc.

MINIMUM WHEAT PRICES

The Alberta Wheat Pool invites the Co-operation of all organized bodies and all interested individuals in impressing upon the Federal Government and the people of all Canada the importance of fixing a minimum price for wheat above the average cost of production.

This can best be done by resolutions passed by boards of trade, municipal councils and other similar organizations, or letters to members of parliament

ALBERTA WHEAT POOL

Purity Flour means real economy. It goes farther. Rich in nourishing gluten, it makes bread that rises right up out of the pans—and the most delicious biscuits, cakes, pies and flaky pastry ever baked!

PURITY FLOUR

Best for all your Baking

Tourist Trade Revenue

It would appear that provincial governments of the prairie provinces which neglect to spend sufficient money to maintain their highways in good condition are overlooking a good bet, if figures of tourist traffic from the other side of the international boundary into Canada are an index of what might be expected if highways were made attractive enough to draw the quota of this windfall which the western provinces might reasonably expect.

Recently published figures show that tourists entering Canada in 1935, most of them from the United States, were responsible for a total expenditure of \$202,314,000 in this country during their stay here, if an estimate published by the Dominion department of trade and commerce can be accepted as reasonably accurate.

This is an enormous revenue from such a source when it is remembered that the principal export industry of this agricultural country totalled in value \$156,153,857 in the same year, this being the value placed on Canadian exports of wheat and wheat flour for 1935 by the External Trade branch of the Dominion bureau of statistics.

Thus the tourist trade to Canada in 1935 was worth approximately \$46,000,000 more to the country than the principal exported agricultural commodity and, when it is pointed out that a substantial proportion of tourist expenditure means clear profit, the value of the traffic in comparison is greater than even appears on the surface.

But when one examines the comparative figures of income from tourist traffic by provinces it is immediately apparent that the share derived by the prairie provinces of this newly developed source of wealth is but a drop in the bucket compared with the income enjoyed by some of the eastern provinces and British Columbia from the same source.

For example, figures compiled by the Saskatchewan Motor Club show that on an average expenditure basis, varied according to length of time of their visits, American tourists entering the province direct through ports of entry on the contiguous section of the international boundary line spent, approximately \$522,024 in Saskatchewan in 1935, to which is added another \$62,670 as the estimated expenditure of those who entered the country through Manitoba and Alberta ports and spent a portion of their time in Saskatchewan, making a total of \$1,474,714 as Saskatchewan's share of this new industry—if it may be called such—last year.

In other words all that Saskatchewan derived from this source of new wealth was less than one per cent of the Dominion's total income from tourist traffic. Without going into further detailed figures it may be said that the tourist revenue accruing to Alberta and Manitoba for the same period were relatively commensurate.

There are certain factors responsible for British Columbia and some of the eastern provinces, and particularly Ontario and Quebec, securing the great bulk of this traffic. One of these is the fact that these provinces are relatively closer to the large American centres of population. This is the principal reason. Another is the greater proportion of paved roads on the Canadian side in these provinces directly linked with similar highways in the United States.

But even after allowing for the greater advantages enjoyed by those provinces mentioned, the fact still remains that the prairie provinces are not getting anything like their proper share of tourist traffic and that for them there are great potentialities yet undeveloped.

The relative scarcity of American tourists in the prairie provinces is partly a heritage of the comparatively recent days when visitors found it a frequent experience to have their cars bogged down in mud. Highways have been materially improved since that time but the stigma earned by prairie roads in those days has by no means been lived down yet. This coupled with the difficulty of financing maintenance of a great mileage of gravelled highways during the still more recent depression years has had the effect of keeping away from the prairie provinces a good many who would have come, but for the skepticism grounded on former experiences.

This is a handicap which has to be overcome before the three western provinces can expect to share in full measure the dividends of tourist traffic to which their natural advantages and beauties entitle them. This can only be done by taking the necessary steps to see that the network of highways already built is maintained in good condition and that as far as possible the dust nuisance of the gravelled highways is eliminated or at least mitigated to a minimum coupled with judicious advertising.

Has Modernized Turkey

People Owe Great Deal To President Of Republic

Mustapha Kemal Pasha, President of the Turkish Republic since 1923, has had eight attempts on his life in 15 years. He pays a servant £3,000 a year, working 30 minutes a day to taste his food before he eats it—in case of his being poisoned. Mustapha Kemal—known as "Grey Wolf"—has made Turkey a modern State. The Turkish army discarded the fez at his command, and he has altered women's veils, the Turkish calendar, and has thrown over dervishes. He has separated Church and State, established art schools where students work from living models. In Ankara, the capital, there are seven monuments of him. Mustapha Kemal is fond of dancing and gay company. He encourages the young folk in enjoying themselves. He is 56 years of age, the son of a minor official, and was educated at the Military College, Turkey.

Belong To Fine Arts

Softball and bridge have been elevated to the "fine arts" by Vancouver's public library. The library's latest report lists a book of official rules of softball and a book on bridge under the fine arts section, along with such intricate hobbies as hand-loom weaving and metalcraft.

Musical instruments used by the Chinese are drums, cymbals, horns, lutes, castanets and flutes. There are three varieties of bells—po-chung, te-chung and pien-chung.

A New Fire Extinguisher

Plan Erection Of Network Of Machine Gun Nests Along Border

A plan for a series of machine gun nests along the Belgian frontier and extension of the term of service, Signor Redaeli and Signor Finali of Italy and Herr Puschner of Austria, a bomb that kills fire.

The demonstration was arranged in collaboration with the Strasbourg Fire Brigade, which built some stage enclosures and set them alight. They also lit petrol and rubber. The new bombs killed all these fires, and aroused great enthusiasm.

The principle of the new bomb is like blowing out a candle on a vast scale; the force of the explosion cuts out the fire. The chemical substance they contain is quite harmless. It possesses the property of cooling the material it touches, and so prevents the debris from smouldering afterwards. The effect of these bombs on blazing petrol in the open air was amazing.

New Grain-Testing Station

An experimental sub-station is to be established north of Davidson in Central Saskatchewan. There are already 25 of these stations in the province for the testing of grain and grasses under different methods of cultivation.

The tons of beeswax used in automobile manufacturing require the labors of 93,000 bees.

People of Germany are drinking more sparkling wine than before the World War.

Toc H Movement

Celebrated Its Coming Of Age At Ceremonies In London

Toc H, a movement which began in a dugout in Flanders, on the Ypres road, in 1915, celebrated on Sunday, June 28, its coming-of-age in the Crystal Palace, London.

In an address at the ceremony of "lighting of lamps," the Duke of Kent traced the development of the movement through the empire from its humble beginning to the present stage, remarking that Canada now has 38 Toc H units and two houses, South Africa 87 units and one house, and Australia 144 units and one house.

He read a message from the king conveying his sincere greetings and congratulations and recalling that from the earliest years of the movement he had presided practically every year at the lighting of the lamps of maintenance.

(The objects of the Toc H movement are to "perpetuate the lessons of cheerful self-sacrifice and mutual help, without barriers of class or creed, taught by the young men who laid down their lives during the Great War." The symbolism of the lamp represents the keeping alive of the ideals which they embodied".

Referring to the recent visit of "Tubby" Clayton—Rev. P. B. Clayton, founder of the movement, the duke said it had stimulated Toc H in that part of the world, where many of its members are drawn from the army, navy and air force.

British Broadcasting

Government Extends Charter Of The B.B.C. For Ten Years

Following the recommendations of a special committee on broadcasting, it was announced in London that the government would extend the charter of the British Broadcasting Corporation for 10 years from Dec. 31 next, increase the number of governors from seven to 10 and increase the corporation's share of revenue from public receiving licences. Cost of such licences will remain at 10 shillings.

The government held the view the corporation should continue to refrain from commenting upon current affairs, both in broadcasts and in the corporation's own publications.

It approved the suggestion of the committee—which submitted its report last March—that empire broadcasting service should be developed. It also held that the licensing of relay stations should be continued for another three years, the postmaster-general being empowered to take over the relays afterward.

The government also approved the continued exclusion of advertisements and believed the responsible departments should take all possible steps to prevent the broadcasting of foreign advertisement programs.

However, the government rejected the proposal of the broadcasting committee, which was headed by Lord Ilfracombe, that the cultural side of broadcasting should be transferred to a cabinet minister.

Belgian Defens Project

Plan Erection Of Network Of Machine Gun Nests Along Border

A plan for a series of machine gun nests along the Belgian frontier and extension of the term of service, Signor Redaeli and Signor Finali of Italy and Herr Puschner of Austria, a bomb that kills fire.

The demonstration was arranged in collaboration with the Strasbourg Fire Brigade, which built some stage enclosures and set them alight. They also lit petrol and rubber. The new bombs killed all these fires, and aroused great enthusiasm.

The principle of the new bomb is like blowing out a candle on a vast scale; the force of the explosion cuts out the fire. The chemical substance they contain is quite harmless. It possesses the property of cooling the material it touches, and so prevents the debris from smouldering afterwards.

The defence project, which has been approved by the superior defence council, calls for erection of a network of small machine gun nests. They would be manned by trained mobile troops and would be reinforced by a "destruction system" under the Maginot plan. The system of destruction would consist of mining bridges, roads and railways throughout the border regions to delay the advance of any invading troops.

In advocating the increase in the term of obligatory service, Gen. Maginot said the measure would provide the nation with a sufficient number of trained troops to carry out his defence plan.

The pirarucu, a fresh water fish, is found only in the Amazon river and its tributaries. Resembling a whale, it often weighs as much as 200 pounds.

The famous mineral springs of Bath, England, produce 500,000 gallons of medicated water daily.

Violent Deaths

Automobile Accidents, Suicides And Other Mishaps Take Heavy Toll

Automobile and other accidents, suicides and homicides brought death to 6,885 people in Canada last year, the Dominion Bureau of Statistics reported. Almost all forms of violent death except suicide showed increase over 1934 and crept up toward record high levels registered around 1930 and 1931.

Automobile mishaps took 1,224 lives or 11.2 per 100,000 of population compared with 1,115 in 1934. This was the largest toll since 1931 when 1,316 fatalities occurred.

6,885 persons or 62 per 100,000 met death from external violence in 1935. This, too, was the highest total since 1931 and compared with 6,469 in 1934.

Suicides accounted for 902 deaths, compared to 927 in 1934 and homicides for 153 compared with 142 in 1934.

All provinces with the exception of Prince Edward Island, New Brunswick, and Alberta showed a larger number of motor vehicle fatalities in 1935 than in the preceding year. Prince Edward Island, however, had two deaths as compared with five, New Brunswick 40 against 52, and Alberta 45 against 61.

Prince Edward Island had the lowest rate, 2.2 per 100,000 and Saskatchewan stood next with a rate of 4.1.

SELECTED RECIPES

MARSHMALLOW CHOCOLATE LOAF CAKE

3 squares unsweetened chocolate
¾ cup cold milk
2 cups flour
2 teaspoons Magic Baking Powder
½ teaspoon salt
¼ cup butter
1½ cups sugar
8 eggs (yolks only)
1 teaspoon vanilla

In a double boiler put chocolate and milk, when melted stir until quite smooth—cool. Sift flour once, measure, add baking powder and salt, sift together three times. Cream butter, gradually add sugar and beat until light and fluffy. Add yolks which have been beaten until black and lemon colored, and vanilla, then add flour mixture alternately with the cooled chocolate, a little at a time, beating well after each addition until smooth. Bake in a well greased pan in slow oven (235 degrees F.) for 25 minutes, increase heat slightly (to 350 degrees F.) and finish baking 45 minutes. Turn out carefully and while still warm cover bottom with marshmallows that have been rinsed off with cold water and cut in halves cross-wise. When cake is cool cover with chocolate frosting.

Invisible Light

Will Be Given By Lamps In Near Future Is Prediction

In the near future lamps will give "invisible" light. This forecast has been made by J. N. Webb, general manager of the Hull (England) Corporation Electrical Department.

"Lamps will be able to give out not only visible light, but what we call 'invisible light,'" he said. "Scientists are still striving for increased beauty as well as increased efficiency."

India Has Odd Bridge

A bridge across the Jhelum River in Kashmir is made of wickerwork. It consists of three ropes made of hazel twigs, one to walk on and the others to hold, the ropes being kept in position by V-shaped branches every six feet. Although appearing frail and swinging about in a gale, the bridge is really very strong.

A dwarf in Zululand is 14 years old, but is only 20 inches tall and has not grown for years.

Popping the Question!

Why don't you, too, get back to Ogden's Fine Cut? Times are better, and Ogden's is a better tobacco—the "one and only" choice of smokers who know that cigarettes rolled with Ogden's are the next best to "tailor-mades". Get yourself a package today—it's Cellophane-wrapped and has the purple easy-opening device. And make sure you use the best cigarette papers—"Chantecleer" or "Vogue".

Lives In Lonely District

Woman Has Gold-Trading Post In British Guiana

A young woman arrived in Boston aboard the Canadian National Steamship liner Lady Nelson and told of conducting alone for four years a gold-trading post in the wilds of British Guiana.

Mrs. Violet McTurk, who has lived in British Guiana since she married "Mick" McTurk, gold and diamond trader, told reporters how she continued her husband's business after he lost his life in an accident four years ago.

"The natives agreed to trade with me, after they pinched me and decided I was all right. They had never seen a white woman until 'Mick' took me back to the post, 200 miles inland from Demerara.

"When Mick died I just went right on with the business. Tourists reach the post quite often, to see Kite Teer Falls, which is, they tell me, five times larger than your Niagara Falls.

Mrs. McTurk said she had operated a river boat, acted as a guide for tourists, and the rest of the time conducted her store at the post, where, she said, she sold everything from rum to ammunition. On this, her first visit to this country, she said she would visit Boston and New York. She was born in Barbados.

The Shetland Islands

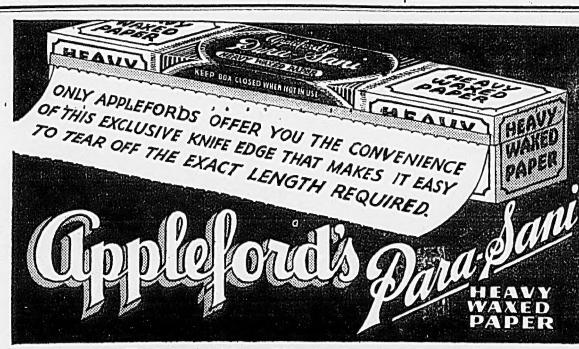

Only 27 Out Of 100 In Group Are Inhabited

The Shetland group consists of 100 islands, 27 of which are inhabited. The largest are: Mainland, Yell, Unst, Fetlar, Bressay and Whalsay. The islands seldom rise to more than 500 feet above sea level. Much of the soil is peaty, and barely one-sixth is under cultivation. Cattle and sheep are grazed and the small, sturdy Shetland ponies and Shetland wool are well known. Fishing is one of the chief occupations and the whale industry is of importance. Originally settled by Norsemen, the islands remained under Norse rule until the marriage of James III. of Scotland to Margaret, princess of Norway.

Utah's Great Salt Lake

Because there's so much salt in Utah's Great Salt Lake, you can't sink or even submerge yourself in it. But it's still possible for an inexperienced swimmer to drown in the lake by going beyond his depth, losing his balance and being suffocated by the brine. But even his body would float on the surface.

Statistics reveal that for every three men aged between 75 and 80, there are four women. For every four men more than 85, there are seven women.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

Softball and bridge have been elevated to the "fine arts" by Vancouver's public library. The library's latest report lists a book of official rules of softball and a book on bridge under the fine arts section, along with such intricate hobbies as hand-loom weaving and metalcraft.

Musical instruments used by the Chinese are drums, cymbals, horns, lutes, castanets and flutes. There are three varieties of bells—po-chung, te-chung and pien-chung.

"My Mistake was Using CHEAP MUSTARD!"
I never knew there was so much difference in mustard! I thought I was economizing when I got more of the cheap mustard.

"I've learned my lesson! It doesn't pay to waste good materials by using a substitute for Pure Mustard. I'll stick to KEEN'S D.S.F. MUSTARD."

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superfine grinding causes the full mustard flavor.

Original tins for as little as 10¢

D.S.F. Mustard

FLEMING'S FOLLY

— BY —

LAWRENCE A. KEATING

CHAPTER XIX.—Continued

His bullet ripped the weapon from the other's hand. With a hoarse cry Roper tried frantically to regain it. His bellow was that of a maddened animal as nerves sprayed pain over his arm and shoulder. Suddenly he abandoned the gun, stooped, snatched a fresh Colt from the holster. Hell had not touched, and, gripping it, ran closer.

Link waited. A bullet had torn a hole in his trouser leg and perhaps had struck him, but he was conscious only of throbbing pain from his side and shoulder. As the rancher fired again, Link fired. His accuracy repeated; once more Roper Kilgo was disabled.

The crowd uttered a long-drawn gasp, for still the man came on with heightening wolfish fury. The thirty feet that had separated Mell and Fleming now was entirely gone; Kilgo's thick frame hurtled through the air and his claw-like stubby hands shot for Link's wrist and throat.

They crashed, a swirling mass of writhing humanity. A cloud of dust rose so that spectators could not distinguish one from the other. Link's forty-five exploded. A well-placed bullet fast made it slither away in the dust. His antagonist whipped up a knee that grazed his groin. At the same time Roper abandoned his wrist hold and locked fierce-like fingers on Link's throat.

His eyes started from their sockets. His head went foggy and the world receded, then seemed to blot out. A ringing set up in his ears and every muscle went wavery weak.

Hardly before his vision came again the bulldog jaw of Roper Kilgo. And with a supreme mobilization of strength in what he knew was his final blow, Fleming whipped his right arm back, crooking the elbow, then shot forth a terrific slam to the chin.

The fierce, bestial countenance before his sagged away. Dully Fleming heard knuckles meeting jawbone, felt that awful grip on his windpipe relax, felt black-brimmed fingernails scratching over his flesh. He crumpled to the ground as he slid into the yawning gulf of unconsciousness.

When again he opened his eyes they were stinging and heavy. The first face he made out was that of Helen Hamilton, and he knew she leaned over him, held his head out of the dust with a slender arm about his neck. Gratefully he gulped from

a flat bottle she held to his lips, then sank back sighing.

There was a movement in the circle of bystanders and Sheriff Ames Stephen's grim face appeared. The lawman knelt. "Yuh gonna be all right?" Say, Link, I got news for yuh! Goshamighty, can yuh stand a terrible shock?"

Raw whisky was bringing his senses again under control and he stirred as if to rise. "The money?" he croaked. "Pay—Kilgo! Pieper—"

"Yes! It's been done, Link! Otto brought the cash and I paid him, Oh, my dear!" Helen whispered, searching his wan countenance. "You—you'll be all right?"

He managed to nod. "Buzz?" he asked weakly. "The agreement?"

"It's all arranged, Link. Buzz." She halted, and the long silken lashes fluttered down. Her Stetson, saucily ay, exposed a mass of tumbling hazel hair that slid slowly, downward over the girl's shoulder. "Buzz—got hurt. Roper tried to kill you, and—"

"Buzz interfered," came the vibrant voice of Waco Byrne. "He's in a bad way, Link." He glanced at the girl, who had drawn back and was staring dazedly at the ground. "In fact, Buzz got it. He's dead. But the kid did one heroic thing in his life anymore. God rest his soul!"

Eyne whispered fervently. "He saved your life, son!"

There was a taut silence. As if remembering the news he brought, Sheriff Stephen bent again over Link. "Listen!" he commanded evulantly. "The dam! Fleming's Folly! She goes!"

Link sat up with such suddenness that his forehead brushed the lawman's shoulder. "What!"

In a flash he was on his feet. His shoulder, he noticed, was tightly bandaged. "What'd you say?" he cried in a voice that cracked to weird falsetto notes. "What'd you say about the dam?"

"Hey!" bawled the sheriff. "Bring a boss! Come on, Helen: we got to ride like hell. It's workin'! It's workin'! I tell yuh! That damned dam's a-flooded an' workin'! Link!"

Half an hour later, in the van of two score wildly shouting riders, Helen Hamilton, with her hair flying in the breeze, with her small booted feet firmly braced against the dashboard, urged speeding blacks to a wilder, faster pace. The Triple H springy rattled and careened on two wheels. Thrumming hoofs were like the staccato rattle of a small boy's stick on the pickets of a fence. On all sides of them swarmed excited citizens of Rawhicle ranchers and ranch hands of western Boone County. A wide-eyed, breathless procession, every man with astonishment on his face, every girl larruping the steed under him.

Fleming had one good hand with which to cling to the iron brace beside his seat. With glowing eyes he stared admiration for the girl beside him, driving like some reckless expert charioteer of Roman days—if there were women charioteers! Now and again his look turned front, his eyes squinted hard and hopeful at the whiteness of Silver Creek Dam as it flashed rapidly closer.

On a hilly eminence he ventured to touch her smooth bronzed forearm. Helen glanced over, braced her feet harder, and slowly, deftly, drew the panting blacks to a halt. The horseback men split about them as steer around a post, swerved right, and headed for the up-trail to McLendon's headquarters shack. But this, for the man and girl, was sufficient view of what they wanted to see.

A long moment they sat drinking in the scene. Far below them, in the smooth, vast hollow shape like a half oyster shell, moving water gleamed in irrigation ditches that sprayed fan-like over twenty-six hundred acres. Rapidly, eagerly, glistening triumph in the sun, the precious moisture of Silver Creek rippled and eddied in busy currents through the veins of that fan, filling ditches, moistening for the first time the wasteland that no man would own. No one save Link Fleming and Helen Hamilton.

They did not speak for a full three minutes. Their eyes bright, they gulped in the awful beauty and significance of this thing they had brought to pass. At last the girl uttered a long sigh and relaxed in her seat. The spell of his fascination disturbed, Fleming turned for a look, and their eyes met.

"Fleming's Folly!" she whispered huskily. "Fleming's Folly!"

He swallowed hard. There was an obdurate lump in his throat. Then Link reached out and wound her reins about the whip in its socket. Took her small slender hands in his larger brown ones.

But there came interruption. A wild-eyed wily little man with Stetson gone and thin hair tossing atop

his shiny head, raced up on a diminutive mustang. He leaned hard on the reins and all but hurtled from his perch as the animal skidded on lowering haunches. He cupped his hands to them.

"Link! By Gawd, it works! Say, I'll give you a hundred an acre, spot cash! One hundred bucks, you an' Helen. Eh? Well sign up right here!"

Fleming looked at her. They smiled. "Reckon not, Otto," he called back to the banker who was jerking his head from them to the fascination of the valley below, and back again. "But well keep our promise about the fifty acres for you."

"Hundreds and twenty-five, then? Hundred an' thirty-five? I'll buy it all! Eh? No? Look at me, Link; I backed you, didn't I? Believe in this thing, didn't I? Give a hundred an' fifty an acre for any amount?" The Rawhicle banker cried in desperation.

"Otto! I'll give you a tannin' if you don't turn that moth-eaten plug and nosey out of sight—pronto! Can't you see?" Link complained, as he maneuvered to circle Helen Hamilton's shoulders with his good right arm. "Can't you see I'm buyin' love?"

"What? You—"

Slowly he thrust away the check book he had produced. A disgusted expression crossed his face. Otto Pieper took up his reins, clucked to his mount, and started reluctantly away.

Fifty yards distant he succumbed to a violent urge to glance around. But the banker jerked quickly from again, his lips screwed in the oval of one kiss. A soft, reflected gleam entered his shrewd grey eyes. Pieper grimmed and shrugged his shoulders.

"Fleming's Folly. Huh?"
The End.

State Pension Plan

"Big Family" Law Has Been Introduced in Soviet Russia

All families in the Soviet union with more than six children, the youngest of which is under five, begin immediately to receive state pensions. A "big family" law to this effect was promulgated yesterday.

Divorced persons will have to pay up to 50 per cent. of their incomes for the support of their children, and divorces will be made more difficult by heavy taxation.

Many fathers, it was announced, for years have refused to support their children, began making payments, fearing the punishment of two years' imprisonment provided for dodgers of this obligation.

The government will pay 2,000 rubles a year for five years after the birth of the seventh child, and give similar aid at the birth of each succeeding child, including the 10th. After the 10th, 5,000 rubles will be paid for each new baby. An example of the severity with which offenders against the welfare of children are punished was seen in a sentence passed at Kiev. Three former officials of the Ukrainian Council of Labor unions were sentenced to death for embezzling funds assigned for rest homes and the care of tubercular children.

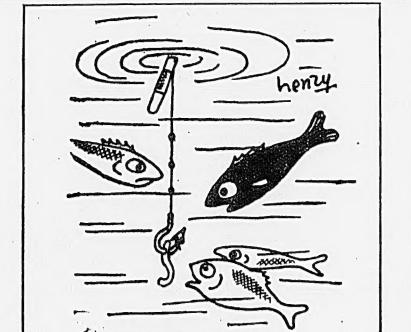

Just In Day's Work

Firemen at Windsor have responded to some strange calls but none stranger than one received by telephone from Detroit. A Windsor woman had gone to the Michigan city for the day and left the hot water heater turned on in her Windsor home. She asked the fireman to turn off the water.

Grocer—"Well, little man, what can I do for you?"

Little Man—"Mother sent me to get change for a five dollar bill, and said she would give you the five dollars tomorrow."

It took 76 years to build the Great Pyramid of Egypt.

"Do you think that can be the Maginot line?"
(The Maginot line is France's famous defence barricade along the borders of Germany).—Marianne, Paris.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

Anxious To Secure Organ

Branford Historical Society Wants Instrument Now in Montreal

An antique barrel organ, more than 150 years old, sought by the Branford Historical Society, has been discovered in the Indian room of the Chateau de Ramezay in Montreal.

Branford historians are anxious to secure the organ for their museum because it was presented by King George III. to Chief Tayendanequa, of the Six Nations, who became known as Joseph Brant, after whom the city of Branford has been named.

Branford historians are anxious to secure the organ for their museum because it was presented by King George III. to Chief Tayendanequa, of the Six Nations, who became known as Joseph Brant, after whom the city of Branford has been named.

This is hardly possible, because the Chateau de Ramezay is not an antique shop where objects can be loaned or purchased, instead it is a house for historical objects.

The Branford parties will have to address their pleas to the Antiquarian and Numismatic Society of Montreal, and according to past records they are not considered congeners in the habit of letting a valuable museum piece slip out of their hands.

The organ stands about two feet high and resembles more a modern humidifier or an electric iron than a musical instrument. It is well preserved in spite of its age and while it has not rendered melodious tunes for more than a century, by pumping the bellows by hand, instead of using the handcrank, it is still possible to hear tunes, but these sound like the whistles of a locomotive.

The name of the maker is completely erased, and there should be no mystery whatsoever. The statues, he points out, weigh only five or six tons.

He insists they could have been carved in the inland quarries from which the stone originated and dragged to their present position by natives. Four hundred men could drag them with ropes of native weaving, he says.

The second "mystery" which he has defined is that the inhabitants of Easter Island are the remnants of the population of a lost continent. He identifies them as being related to the Maori of New Zealand and calculates they came to the island in the 12th century.

Finally, the third "mystery" of script on wooden tablets found on the island is explained by Dr. Metraux who insists that it is not a true written language but rather a device to aid the memory of the natives in reciting sacred legends.

No Longer A Theory

Existence Of Spin Of Light Has Been Proved

The "spin" of light, that is, the twisting force of which its rays exert on anything solid, a scientist never dead before, is announced by Dr. Richard A. Beth of the Worcester Polytechnic Institute, Massachusetts. The spin of light, or its angular momentum, means that each particle, or photon, of light is capable of spinning like a speeding rifle bullet. This spin had been only theory until Dr. Beth found a method of proving its existence and measuring it by training a beam of light on a circular quartz plate one inch in diameter and about three thousandths of an inch thick.

Showing Poor Judgment

A squirrel that attempted to steal eggs from a robin's nest in St. George's Park, Guelph, Ont., showed extremely poor judgment. Three robins chased him down the tree, up and through the branches of a second one, and to the ground, again, then up a telephone pole and out along a cable. The birds abandoned the attack.

Likes His Adopted Country

Native Of Holy Land Prefers Canada To Palestine

Louis Kassad prefers northern Victoria county even with its bleak, cold winters to his sunny native land of Palestine, he told newspapermen at North Sydney, Nova Scotia, when he returned from a visit to the Holy Land, his first in 40 years.

During his trip he visited many of the Biblical cities, saw relatives he had not seen since childhood and witnessed the first of the Arab-Jewish clashes. Back in Canada, he expressed his joy at returning to his adopted country.

Claims Many Victims

Diseases of the heart were responsible for 221 deaths in Saskatchewan during the last three months of 1935, according to the Dominion Bureau of Statistics. Cancer was the next most serious disease, claiming 148 lives, while pneumonia was third, causing 126 deaths.

She: "Oh, John, you are so extravagant."

He: "The dinner check was only \$10."

She: "But you gave the waiter 20 cents! I saw cents!"

The Tunguses of Siberia have no general name for the reindeer, although they have specific names for "tame reindeer," "wild reindeer," "young reindeer," etc.

Sweden is adding \$2,000,000 to its defense costs.

Behold I have refined thee, but not with silver, I have chosen thee in the furnace of affliction. Isaiah 48:10.

Be patient suffering soul; I hear them cry. The trial fires may glow, but I see the silver and I will refine. Until My image shall upon it shine. Fear not for I am near, they help Greater than all thy pain, My love for thee.

God takes a thousand times more pain with us than an artist with his picture, by many touches of sorrow, and by many colors of circumstance, to bring man into the form which is the highest and noblest in His sight, if only we receive His gifts and myrra in the right spirit. But when this cup is put away, and these feelings are stilled or unheeded, a greater injury is done to the soul than can ever be amended. What we should receive for our soul's good we may suffer to pass by us, and nothing comes of it. Then we come to the Lord and complain, and He tells us to open our heart to the pain which will do us more good than if we were always in the spirit of praise.

A Distinguished Veteran

Sir Percival Marling's Worst Moment Was Not On Battlefield

The late Sir Percival Marling, V.C., was one of three survivors who won that decoration in the first Sudan campaign. He also took part in the first Boer War, and only three years before his death, revisited the scenes of his youthful battles in the Sudan as a young lieutenant. Amongst the famous warriors he encountered was Osman Digna, who was reputed a genius centenarian when he died ten years ago after many false alarms. Five years ago Sir Percival published a most interesting book of recollections. From this it may be gathered that his worst moment was not on any battlefield, but on a ceremonial occasion in the heart of London. He was the officer in charge of a mounted escort for Queen Victoria, and foam from his charger's mouth fell on the Queen's veil, necessitating mopping with energetic handkerchiefs by the Princess of Wales, afterwards Queen Alexandra, and the Ladies-in-Waiting. That contretemps brought a shattering look from the Queen and a premonitory order from the Horse Guards against officers' horses foaming at the mouth.

Serious Surgical Ailment

Winnipeg Doctor Urges An Early Diagnosis Of Appendicitis

The need for early diagnosis of acute appendicitis was stressed by Dr. Gordon Fahrni, Winnipeg, speaking before the Canadian Medical Association. It was in the early stages that operation offered the lowest mortality rate.

In the United States and Canada 25,000 deaths were reported annually from acute appendicitis, equivalent to 20 per 100,000 of population. Appendicitis now ranked only second to cancer as a killing surgical ailment, he said.

Exclusive of the cost of the silver itself, it costs Uncle Sam only \$45 to turn out 1,000 dimes, \$7 for 1,000 half dollars and \$10.50 for 1,000 silver dollars.

ITCH STOPPED IN A MINUTE...

Are you tormented by the itching tortures of eczema, rashes, blisters, foot, crumpled, or other skin afflictions? Use this antiseptic, liquid D. D. D. It is safe, non-toxic, non-irritating, non-staining. It cures most intense itching quickly. It is a "killing" surgical ailment, we prove it—or money back.

Priced as Lows as \$5.95.
Now you can iron in just a few minutes, instead of hours. The Coleman Self-Heating Iron is the answer to your ironing problems. Get it at your local dealer or write us for free information. The Coleman Lamp and Iron are the best in the world. But if you don't buy it, you'll be sorry.

Without Fear Or Favor...

"I WILL hew to the line of right, let the chips fly where they may." It takes a stout heart to adopt this principle of General Grant's, yet it is the everyday matter-of-course attitude of a good newspaper. No matter whose head rolls in the dust, the truth must be told. No matter what storms of protest and vituperation it brings about its ears, your newspaper prints the news as and where it is found, faithfully and accurately. No malpractice to the public injury is hidden or condoned; no improper policy goes unchallenged. Because the newspaper is the forum and the voice of public opinion. It is the moving picture of daily life where all may see and all may judge freely and independently.

"THE truth, the whole truth and nothing but the truth." As conscientiously as though it were under oath your newspaper gives the plain unvarnished facts. Disagree with its editorials if you will—you have a right to your own opinions—but in the news columns you will find only the news, candid and impartial, on which to base your own judgments.

Miss Betty Milligan Prop.

Mr. W. D. Stacey, of Edmonton, Building Superintendent, was a pleasant caller on Chinook friends Wednesday afternoon. Mr. Stacey in the early days was partner of the Banner Hardware Co., in the good old days when Chinook was a prosperous town.

Already many tourists have passed through Chinook on their way to the Calgary Stampede, Banff and other points west. Very few have been noticed going east.

Mrs. Pigeon and baby (nee May Petersen) also step daughter and step son of Drum week for Vancouver B. C. Heller, are visiting with the where she will take in the former's parents, Golden Jubilee at that city.

Mr. and Mrs. McNaughton, also Mr. and Mrs. Campbell, of Youngstown, were Chinook callers on Monday afternoon. Mr. and Mrs. Isbister also Mr. Isbister, of Peterborough, Ont. went to Calgary last weekend to take in the Stampede, they also motored to Banff.

Miss Eileen Bjork is visiting with Miss Joan Bayley,

Mr. and Mrs. Powell and children of North Dakota, who have been visiting at the Wilson home last week, left Friday for Turner Valley. Mrs. Powell is a sister of Mrs. Wilson.

Mrs. Wilson and son Hugh accompanied them as far as Turner Valley, they returned home Monday.

THEN THE PHOTOGRAPHER RAN
This picture of a guest who came aboard an Imperial Oil tankship on the Atlantic Ocean was snapped by one of the crew whose next act was to "snap out of it" into the shelter of a deckhouse.

HE CAN'T GO WRONG...
Clear, reliable road maps and courteous, helpful road and tourist information are only two of the extra services gladly given by Imperial Oil stations. ... With Imperial touring information and Imperial gasolines and motor oils, you just can't go wrong. Drop a line to Imperial Touring Service, 92 King St. East, Toronto, for free road maps marked with the best route for that motor trip you are planning.

A HOUSING PROBLEM SOLVED... Before Imperial Oil interests developed the oil fields of Peru there were homes there such as that on the left. Foremost in the development, which involved expenditures of great sums of money put up by thousands of investors, was a program to house the native workers. Its result was that rows of neat dwellings like those above sprang up on the desert near the oil fields.
